

SAHIL H. AKBARI

Frontend Engineer (React / Next.js / TypeScript)

Surat, Gujarat, India | +91 84609 37300 | sahilakbari8460@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Frontend Engineer with 4+ years building scalable, production-grade web applications using ReactJS, NextJS, and TypeScript. Experienced in frontend architecture, application modernization, authentication, data caching, real-time interfaces, automated testing, performance optimization, SEO, and AI-assisted development.

TECHNICAL SKILLS

- Frontend:** ReactJS, NextJS (App Router), JavaScript, TypeScript, GraphQL
- State & Data:** Redux Toolkit, React Query, Zustand, Axios
- Styling:** Tailwind CSS, Bootstrap, Material UI, Ant Design, shadcn/ui, SCSS
- Testing:** Jest, Cypress, Component Testing, API Function Testing, E2E Testing
- Backend (Supporting):** Node.js, Express.js, REST API design
- Architecture:** SSR/ISR, Code Splitting, Reusable Components, Authentication, Route Protection, Responsive Design, WCAG, i18n
- Integrations:** Twilio, Mailchimp, ManyChat, Zoom, Mixpanel, Google Maps API, Razorpay, Stripe, PayPal
- DevOps & AI:** GitHub, CI/CD, Vercel, Railway, Heroku, Git Worktrees, Claude Code, CLAUDE.md, Custom AI Commands

PROFESSIONAL EXPERIENCE

Frontend Engineer <i>MMNovatech — Canada, Remote</i>	Mar 2024 – Present
NovaCRM — AI Voice-Calling & Marketing Automation Platform	
- Contributed to Nova V1 → V2 modernization across ~80–90 pages and 17 modules with a 3-person frontend team over 4 months. - Migrated JavaScript to TypeScript and introduced centralized, type-safe API request/response definitions. - Modernized CSS/Bootstrap toward Tailwind CSS, shadcn/ui, and SCSS; replaced generic loaders with skeleton UI. - Introduced React Query caching using query keys, stale-time strategies, and direct cache updates for rename/delete mutations. - Centralized API definitions and consumed them through reusable hooks instead of inline API calls. - Implemented JWT authentication, protected routes, access-token handling, and automatic logout on 401 responses. - Built real-time WebSocket updates for batch file-upload progress and source/tag update progress. - Built complex and multi-step forms using React Hook Form and custom validation patterns. - Used Jest and Cypress for component, API-function, and end-to-end testing; ~40% automated coverage for assigned modules. - Built AI-assisted workflows with Claude Code, CLAUDE.md, custom commands, and Git worktrees for parallel development.	
Real Estate IDX Platform	
- Architected and developed the frontend from scratch for a multi-theme IDX platform supporting ~50 client websites, 11 themes, and ~40 pages. - Initially worked as the primary frontend developer and later supported a 3-person frontend team as the platform expanded. - Implemented JWT authentication with Zustand, protected routes, Axios interceptor handling for expired sessions, and route-level access restrictions. - Implemented URL-driven property search and filters so search state persists across page refreshes through query parameters. - Built map-based MLS property search with Google Maps, dynamic filters, auto-suggestions, saved searches, and email alerts. - Introduced React Query caching and stale-data management to reduce repeated API requests and unnecessary loading states. - Built reusable components and multi-theme patterns for white-label client experiences. - Improved SEO and rendering through SSR, dynamic API-driven metadata, and code splitting/lazy loading.	

Ouranos Technologies Pvt Ltd. — Remote

- Developed production CRM features and reusable UI components using React, Next.js, TypeScript, Tailwind CSS, shadcn/ui, and Zustand.
- Integrated REST APIs with robust loading/error handling and reusable frontend data patterns.
- Implemented responsive, accessible interfaces and collaborated with design, backend, and QA teams.
- Implemented Jest and Cypress tests for components, API functions, and end-to-end flows.

React Developer

Feb 2022 – Aug 2023

BVM Infotech — Surat, Gujarat

- Translated UI/UX designs into responsive production interfaces using ReactJS and NextJS.
- Integrated REST APIs, managed frontend state, and built reusable components with focus on responsiveness and consistency.
- Worked with Heroku deployment environments and production logs to investigate and debug application issues.
- Maintained code quality through Git workflows and participated in technical implementation discussions.

EDUCATION

Bachelor of Engineering in Computer Engineering

Gujarat Technological University, 2023 | CGPA: 8.76
